

# SPECIAL FUELS

# CUSTOMISED FUEL

Special fuels is a department within Preem that develops and produces fuels specially adapted for unique customer requirements. Preem is Sweden's largest fuel company and has its own refineries with production facilities in Gothenburg and Lysekil. Deliveries can be made in any quantity from one barrel to large-scale deliveries by tanker.

## CONSULTATIVE PARTNER

Special fuels include any fuel which is sold to customers with unique requirements. Our customers have demanding and specific requirements for the finished product. Throughout the process, we serve as a consultative partner. Examples of product groups include:

- Test and certification fuels
- Unique fuel blends
- Fuel for long-term storage
- Production line fuel (first fill)
- Alkylate gasoline

## ON THE CUSTOMER'S TERMS

We work closely with our customers. This ensures a fast and efficient process with a high level of service. Thanks to support from our own refineries, lead times for producing a fuel are short.

We deliver special fuels to customers throughout the world and are certified in accordance with ISO 9001 and ISO 14001. Our biggest area of activity is within the automotive industry, but we also have a number of customers within research and development and customers who carry out engine testing or have other specific product requirements. We also deliver products and components to oil companies and special fuel suppliers.

## CONTAINERS

We deliver special fuels in barrels, IBC containers, ISO containers, and by tanker (lorry or ship).

# EXAMPLES OF PRODUCTS

- Diesel EN590 (all classes)
- Diesel EN590 B7
- Diesel SD10 (RF-06-03)
- Diesel SD10 B10
- Diesel Euro 6 B7
- Diesel Euro 5 B5
- Diesel MK1 (fossil) Swedish
- Diesel RF-03A-84
- Diesel 50-2000 MK3 (sulphur)
- Diesel USA 2D 1065 ULS
- Diesel HVO 100%
- Diesel blended with HVO
- Gasoline 91 cert
- Gasoline 95 Ethanol 10 S and W
- Gasoline Methanol 7 Ethanol 3
- Gasoline 98
- Gasoline Alkylate 2 and 4-stroke
- First fill: Diesel MK1, EN 590 LOW CLOUD
- First fill: Gasoline Alkylate 95
- Components: For Diesel and Gasoline Blending

A black SUV is driving on a sand dune in a desert landscape. The vehicle is moving from left to right, leaving a trail of sand behind it. The background shows rolling sand dunes under a clear sky. The text is overlaid on the lower part of the image.

**WE HAVE BEEN DELIVERING  
SPECIAL FUELS TO CUSTOMERS  
THROUGHOUT THE WORLD  
SINCE 1990.**

# HOW WE DIFFER

Not all fuel companies are alike. Preem's vision is to lead the transition towards a sustainable society. That's why we have developed, among other products, Preem Evolution Diesel Plus – the world's only diesel allowed to bear the Swan Ecolabel, the Nordic region's official ecolabel. Preem Evolution Diesel Plus can be used in all diesel vehicles and be mixed with any other diesel, and it has at least 50 per cent renewable content, making half your journey fossil-free.
